**Samantha Myers**

Doing stuff and things at Ferocia

← Experience

**Ferocia Pty Ltd**

2 yrs 10 mos

Working here

Jun 2025 - Present · 5 mos

Doing things.

Corporate Engineering Manager

Full-time

Nov 2024 - Present · 1 yr

Melbourne, Victoria, Australia · Hybrid

I run stuff.

Technical Support Engineer

Full-time

Jan 2023 - Nov 2024 · 1 yr 11 mos

Melbourne, Victoria, Australia · Hybrid

I'm a door manager, a plumber and also just happen to make sure to keep the IT lights on daily.. until someone needs to unlock a door.

**Redbubble**

Full-time · 1 yr 8 mos

Melbourne, Victoria, Australia

Service Desk Lead

Jun 2022 - Dec 2022 · 7 mos

I manage the service desk team of 3 in supporting day to day IT to Bubbblers, providing constant feedback and support of operations.

Provide my team opportunity to sync weekly and discuss ongoing tickets or learning opportunities they have encounters throughout.

Weekly 1:1 syncs with individual team members to discover any gaps in their knowledge, escalated tickets and discuss their week overall.

Liaise with other departments on how best my team can support them day to day.

Skills: Team Management · Operations Management · Time Management · Management

IT Support Technician

May 2021 - Jun 2022 · 1 yr 2 mos

In this role I provide first class IT support to my fellow Bubbblers, from giving the white glove approach to device setup, providing the best IT induction they could receive and ongoing follow-up and support as they settle in.

My role involves managing accounts on Google Workspace, LastPass and Okta. We also utilise Jamf in our environment, assisting in configuring policies and profiles to be installed on our Mac fleet.

On a day-to-day basis I provide support for macOS in our fleet where required and liaise with our employees to ensure they have everything they need in the IT-world to do the best job they can do.

I take pride in the induction process I have helped to revamp and give some character, over the tired old typical corporate IT induction that many have yet to move on from.

Skills: Mac · IT Service Delivery · IT Hardware Support · Jamf · Inventory Management

Service Desk Officer - Contractor

Department of Correctional Services - South Australia

Sep 2016 - Jan 2017 · 5 mos

Adelaide, Australia

- Take inbound calls and emails from users throughout the South Australian corrections network and triage appropriately to 2nd Level support, other teams within the department or external vendors.
- Providing a prompt and accurate technical support service in both a written and verbal manner that is easy to understand by all levels of user.
- Remotely control and manage user devices to fix technical issues
- Working and managing walkups to the Helpdesk area and triaging appropriately, providing prompt advice if the issue lies outside of scope.
- Work with and diagnose issues with a z/OS Mainframe system and appropriately triage issues to managing team if issue could not be easily rectified
- Create user accounts via the z/OS Mainframe and usage of Active Directory, following a pre-filled user form sent in by users
- Working within Active Directory to create users, groups and manage access
- Usage cloud Exchange service from Dimension Data, creating distribution lists, shared resources and mailboxes

**Frontline Support - IT Residency Program**

Google

Aug 2015 - Aug 2016 · 1 yr 1 mo

Sydney Area, Australia

- Whilst in the ITRP program my role involved support for an extremely wide variety of issues on various systems over phone, text chat and video conference.
- My initial training covered the bare essentials of the role, the expectation was that we would strive to understand the broader requirements over time in the program.
- In this role I supported Mac OSX, a custom Linux distribution and Windows based operating systems which usually varied with each chat.
- I have to solve and manage hardware and software issues either via text chat or phone and determine that the issue was routed to the correct department for further investigation.
- Quick problem solving was a key skill as part of the position, the faster things were done the quicker we could assist others.
- Being able to self-manage was an important daily routine, the expectation is we would take two ongoing chats, as well as maintain the team's ticket queue and solve issues in there.
- Provide certain leadership skills to benefit the team, in my case I was my team's go-to person when they were stuck with finding solutions in some situations
- Adequately identify hardware failure without being physically present to get staff working again as quickly as possible and liaising with the inventory team to arrange replacement.
- Lodge tickets for each interaction with as much information as possible if it were to be picked up by others they understand the current state.
- Monitor and manage the SLO/SLA of the ticket queue during quality assurance shifts to maintain tickets for colleagues who may be out of office or not in for the day yet.
- Working and managing walkups in the local Techstop (walkup assistance)
- Working in the local Sydney Techstop involved face-to-face support, triaging damaged equipment to another department and showing a high level of technical knowledge to maintain the quality of service for in this area.

**Customer Service Representative**

Internode

Sep 2014 - Apr 2015 · 8 mos

Adelaide, Australia

- Take inbound and outbound calls of customers of the company, this means every case is different and requires a different touch
- Provided prompt and friendly technical support when dealing with ADSL, Email and general IT problems with customers
- Troubleshoot and diagnose ADSL, NBN and WDSL faults
- Read and interpret diagnostic data to determine where faults lie

- Take on customer feedback through NPS (Net Promoter Survey) comments and results to improve my abilities and skills to deal with customer problems
 - Learn the interfaces of many modems/routers to easily walk customers through configuring their devices
 - Develop relations with internal departments to gather more information and assistance
- Take part in team events and meetings and put forward new concepts and ideas to make our job easier

**Town of Gawler**

3 yrs 1 mo

Digital Local Government Project Officer

Aug 2013 - Aug 2014 · 1 yr 1 mo

- In this role I had to generate and work with a team to create a framework for video conferencing facilities within the Town of Gawler and the wider community.
- Meet with possible vendors to gather an understanding of services on offer.
- Work through tender documentation and selection to find a suitable company to develop services.
- Implement video conferencing and various other forms of unified communication into the existing Town of Gawler infrastructure.
- Develop training plans for the community aspect of the project to enable anyone to use the service.
- Work with web developers to create a portal for customer service and also video conferencing with planners and other staff.

IT Support Officer

Aug 2011 - Aug 2014 · 3 yrs 1 mo

- Increased efficiency in responding and dealing with staff helpdesk requests in under 6 months.
- Developed a universal system image for corporation wide deployment, including in-house testing prior to large scale deployment. This also formed part of a changed hardware deployment taking the rollout from three weeks to one.
- Application testing, ensuring applications had stability on our system image as well as with existing applications.
- Investigating new hardware and their applications, varying from tablet use cases to switching to a VMware Thin Client infrastructure.
- Updating and maintaining the Town of Gawler website through a Unity CMS
- Working with Microsoft Server 2008 R2 and Server 2012 including Active Directory maintenance
